

Reduce & Reuse that is Epico Resolve – mobile accessories made from recycled materials

Epico introduces a new collection of mobile accessories, Epico Resolve, based on the use of recycled materials. Epico Resolve products are the answer for those who want to contribute to a more sustainable future through their choices while also looking for accessories they can rely on in the office, at home and on the go.

The Epico Resolve line was created with a sustainable future in mind and is designed to meet the everyday needs of our customers. It includes accessories like power banks, hubs, chargers, cases and cables. All with the utmost consideration for the use of recycled materials, be it recycled aluminium or plastic.

Compared to the production of identical products from non-recycled materials, Epico Resolve reduces the carbon footprint and consumes previously used materials that were originally made for other purposes, so they don't end up in the not-so-eco-friendly world of landfills.

When selecting products, we considered how they could accompany you throughout the entire day, no matter where you are. Among the Epico Resolve products, you will find, for example, the USB-C Hub Aluminium 6in1, which supports 100W pass-through charging and expands your device with the necessary ports; 38W Dual Car Charger, 30W GaN Charger, and 1.2m PD Cable for efficient charging in the car and at home; Mag+ Dual Power Bank for adding power on the go; and Case Magnetic or Edge to Edge Glass for maximum protection of your iPhone.

The collection was made using these recycled materials:

- 100% recycled aluminium, for example from beverage cans, car doors or window frames,
- 100% recycled ABS and PC, for example from household appliances or plastic bottles,
- 100% recycled TPE, for example from tires or kitchen utensil handles,
- 42% recycled glass from unused glass products.

If you're looking for quality accessories for you and your devices while contributing to a more sustainable future, choose Epico Resolve.

About Epico

Epico represents our distinctive approach to mobile accessories, flexibility, quality and, above all, reliability. We have earned the trust of dozens of partners and look forward to you being one of them or becoming one of them. From day one, we have been manufacturing our products with pride and passion. We set no small goals and do everything we can to make our products as high quality as possible and our customers as satisfied as possible.

We are the preferred B2B partner for mobile accessories in more than 30 countries, and with nearly a decade of experience, we reliably deliver comprehensive, tailored solutions for distributors, Apple Premium Partners, Apple Premium Resellers, and electronics retailers.

Epico was founded in the summer of 2014 when Martin Habina and Roman Nováček agreed that they wanted to do things differently and better together. They decided to focus on electronic accessories compatible with brands like Apple and Samsung. Quality, modern technology, and sustainability were essential to them. All this, combined with a minimalistic functional design, makes all accessories not only work perfectly but also look good. These are the values Epico continues to build on today.

At Epico, we work hard every day to ensure that every customer finds the right accessory in our portfolio for their needs and preferences.

We cover your back anytime, anywhere.
